

Tetrasulfophthalocyanine

Cat. No.:	HY-W127721
CAS No.:	33308-41-7
Molecular Formula:	$C_{32}H_{18}N_8O_{12}S_4$
Molecular Weight:	834.79
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Tetrasulfophthalocyanine is an organic compound commonly used as dyes, photosensitive materials and catalysts. It can be used in certain organic batteries, solar cells, and laser printing, and is widely used in chemical analysis, biotechnology, and environmental monitoring. In addition, this compound is also used as a substrate or catalyst in certain biochemical reactions.
In Vitro	Phthalocyanine tetrasulfonic acid is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
