

γ-Carboxy-DL-glutamic acid

Cat. No.:	HY-W141955
CAS No.:	56271-99-9
Molecular Formula:	C ₆ H ₉ NO ₆
Molecular Weight:	191.14
Target:	Amino Acid Derivatives
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	γ-Carboxy-DL-glutamic acid is a glutamic acid derivative. γ-Carboxy-DL-glutamic acid is optically active ^{[1][2]} .
In Vitro	Amino acids and amino acid derivatives have been commercially used as ergogenic supplements. They influence the secretion of anabolic hormones, supply of fuel during exercise, mental performance during stress related tasks and prevent exercise induced muscle damage. They are recognized to be beneficial as ergogenic dietary substances ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
