

Product Data Sheet

Polyoxyethylene tridecyl ether

Cat. No.: HY-W250166 CAS No.: 78330-21-9

Target: **Biochemical Assay Reagents**

Pathway: Others

Sealed storage, away from moisture Storage:

> Pure form -80°C 2 years -20°C 1 year

* In solvent: -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture)

Polyoxyethylene tridecyl ether

SOLVENT & SOLUBILITY

In Vitro

H₂O : ≥ 100 mg/mL

* "≥" means soluble, but saturation unknown.

BIOLOGICAL ACTIVITY

Description	Poly(ethylene glycol) (12) tridecyl ether is a nonionic surfactant belonging to the family of ethoxylated fatty alcohols. It is commonly used as an emulsifier, solubilizer, and wetting agent in a variety of industrial and personal care products. Poly(ethylene glycol)(12) tridecyl ether has various properties that make it suitable for these applications, including its low toxicity, high solubility in water and organic solvents, and ability to stabilize emulsions. In addition, it can be used as a raw material for the production of other surfactants and specialty chemicals.
In Vitro	Poly(ethylene glycol) (12) tridecyl ether is a biochemical reagent that can be used as a biological material or organic

compound for life science related research.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
