

DSPE-PEG-Rhodamine, MW 5000

Cat. No.:	HY-W440921
Target:	Liposome
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

DSPE-PEG-Rhodamine, MW 5000 is a phospholipid polyPEG with red fluorescent. The polymer can form lipid bilayer and be used to prepare nanoparticles or liposomes for targeted drug delivery. Rhodamine has maximum absorption at 570 nm and emission around 595 nm and can be easily traced using an imaging technique.

Caution: Product has not been fully validated for medical applications. For research use only.
