

Fluorescein O-acrylate

Cat. No.:	HY-W923132
CAS No.:	193419-86-2
Molecular Formula:	C ₂₃ H ₁₄ O ₆
Molecular Weight:	386.35
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

Fluorescein O-acrylate (Acryloyloxy fluorescein) is a highly efficient fluorescent monomer that exhibits strong quantum yield in aqueous solutions, with its excitation and emission wavelengths situated within the visible light spectrum. This versatile monomer can be copolymerized with various compounds, including styrene, and acrylamide, enhancing its ability to bond with macromolecules.

Caution: Product has not been fully validated for medical applications. For research use only.
