Storage: Please store the product under the recommended conditions in the Certificate of	Target:	Isotope-Labeled Compounds	
	Pathway:	Others	D O
	Storage:		

BIOLOGICAL ACTIVITY		
Description	Ethyl cinnamate-d <sub>5</sub> is the deuterium labeled Ethyl cinnamate[1]. Ethyl cinnamate is a fragrance ingredient used in many fragrance compounds. Ethyl cinnamate is a food flavor and additive for cosmetic products. Ethyl cinnamate is also an excellent clearing reagent for mammalian tissues[2][3].	
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
