

Formic acid ammonium

Cat. No.:	HY-Y0488A		
CAS No.:	540-69-2		
Molecular Formula:	CH ₅ NO ₂		
Molecular Weight:	63.06		
Target:	Endogenous Metabolite		
Pathway:	Metabolic Enzyme/Protease		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Formic acid ammonium salt is an endogenous metabolite.	
IC ₅₀ & Target	Microbial Metabolite	Human Endogenous Metabolite

Caution: Product has not been fully validated for medical applications. For research use only.
