

## Formamide-d<sub>1</sub>

Cat. No.:	HY-Y0842S4
CAS No.:	35692-88-7
Molecular Formula:	CH <sub>2</sub> DNO
Molecular Weight:	46.05
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Formamide-d <sub>1</sub> is the deuterium labeled Formamide[1]. Formamide is an amide derived from formic acid and has been used as solvent for many ionic compounds.
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
