

Cuprous iodide

Cat. No.:	HY-Y0961
CAS No.:	7681-65-4
Molecular Formula:	CuI
Molecular Weight:	190.45
Target:	Others
Pathway:	Others
Storage:	4°C, stored under nitrogen, away from moisture * In solvent : -80°C, 6 months; -20°C, 1 month (stored under nitrogen, away from moisture)

CuI

BIOLOGICAL ACTIVITY

Description	Cuprous iodide (Copper(I) iodide) is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
In Vitro	Cuprous iodide is an antibacterial compound. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
